Course Synopsis

CISCP certification is open to all persons who have relevant knowledge in supply chain and for those who want to gain a broad knowledge of International Supply Chain Management that can be applied in their organisation.

Prerequisite eligibility for the certification is a minimum of three years business experience with a Bachelor degree or five years of experience with a diploma.

This certification program will test for an understanding of contemporary international supply chain management. The increasing integration of all functions of the firm requires that supply chain professionals must be aware of the impact that logistical decision-making has on other elements of the firm's strategic goals and objectives. In addition, the current supply chain professional must have an awareness of the changes in and increased use of technology, emphasis on strategic planning, and supply chain integration as a competitive imperative.

Key Objective Training CISCP Certified International Supply Chain Professional

Acquires knowledge and skills in a broad range of work activities, usually performed in a wide variety of tasks, some of which are complex and non-routine.

Exposes to emerging processes and technologies in evolving in the International business.
